Foreword	9
Chapter One: Introduction	11
Chapter Two: The structure of a story: analysis of the running text	15
Chapter Three: Textual units: patterns and boundary signals	51
1. Text segments	51
2. Initial sentences	56
3. Settings	58
3.1. Local settings	58
3.2. Temporal settings	59
4. Theme maintenance vs. theme shift	61
5. Flashbacks	64
6. Digressions	65
7. Secondary narrative	67
8. Conclusions	68
Chapter Four: Participants and Narrator	69
1. Participants	69
2. Pirx as participant: narrator or focalizer?	70
3. Non-characters	76
4. Conclusions	79
Chapter Five: Principal means of text structuring	81
1. Introductory remarks	81
2. Grounding	81
3. Aspect	83
3.1. Aspect and ‘event sequencing’	84

3.2. Non-plot-advancing segments: aspect and other features	87
3.3. Imperfective aspect as participant characterization	89
3.4. Imperfective in non-descriptive segments	90
3.5. Imperfective as 'off-plane event sequencer'	91
4. Tense	94
4.1. The past as unmarked narrative tense	94
4.2. Temporal adverbs in narrative	95
4.3. The present tense in narrative	96
4.4. A periphrastic 'prospective' narrative tense	100
4.5. Tense in subordinate clauses	101
4.6. Tense-switching	101
5. Subordinate clauses and grounding	102
5.1. 'When'- clauses in narrative	102
5.2. Content clauses in narrative	104
5.3. Relative clauses in narrative	105
5.4. Other subordinate clauses in narrative	106
6. Recapitulative abstract substantives	107
7. Conclusions	109
 Chapter Six: Linkage	 110
1. Coordination of predications	110
2. Connecting particles	111
3. The particle <i>a</i>	112
3.1. The particle <i>a</i> as a marker of juxtaposition of the content of two predications	112
3.2. Parallel statements connected by <i>a</i>	115
3.3. Commentative parenthetical clauses with <i>a</i>	116
3.4. The particle <i>a</i> in monologue and dialogue text segments	117
3.5. The particle <i>a</i> with <i>wiec</i>	118
4. The particle <i>i</i>	119
4.1. The particle <i>i</i> connecting logically ordered predications with a common subject	119
4.1.1. The particle <i>i</i> in coordinated perfective clauses	119
4.1.2. Clauses coordinated by the particle <i>i</i> with non-durative, iterative imperfectives	120
4.1.3. Clauses coordinated by the particle <i>i</i> with durative, non-iterative imperfectives	121
4.1.4. The particle <i>i</i> connecting logically ordered predications with different subjects	123
4.2. The particle <i>i</i> as a highlighting particle	125
4.2.1. The particle <i>i</i> marking a turning point in the narrative	125
4.2.2. The particle <i>i</i> as a focus marker	126
5. Adversative particles: <i>ale</i>	127
5.1. Unsuccessful or unfulfilled actions, failed attempts	127
5.2. Unexpected outcomes	129
5.3. The particle <i>ale</i> in clauses following expressions of states of affairs	130

5.4. The particle <i>ale</i> in sentences with evaluative stance	131
5.5. The particle <i>ale</i> in dialogue	132
5.6. The particle <i>ale</i> in free indirect discourse	134
5.7. The particle <i>ale</i> in clauses marking a narrative break	136
5.8. The particle <i>ale</i> as a focus marker	137
6. Coordination of sentence constituents	138
7. Summary and conclusions	139
 Chapter Seven: Constituent sequencing	 145
1. Introductory remarks	145
1.1. Working definitions	145
1.1.1. Theme and rheme	145
1.1.2. Subject and Predicate	147
1.1.3. Agent	148
2. Constituent sequencing in verbal sentences	148
2.1. Basic word order in Polish?	148
2.2. The occurrence of the pronominal subject	149
2.3. The position of the subject	152
2.3.1. The position of the subject with verbs of weak predication	152
2.3.2. The position of the subject with verbs of speech	154
2.3.3. Expanded subjects of verbal and non-verbal sentences	157
2.4. Constituent sequencing in digression closing	158
2.5. Constituent sequencing in presets	159
3. Distribution of information in nominal sentences	162
3.1. The sequence of <i>to</i> and <i>być</i>	166
3.2. A note on number/gender congruence in the nominal sentence	172
4. Conclusions	172
